Cover Letter

Dear Hiring Manager,

I am excited to apply for the **Full Stack Engineer** position at your organization. As a Computer Science graduate with **2+ years of hands-on experience**, I have built scalable, production-ready web applications with a strong focus on **performance, maintainability, and user experience**.

Throughout my internships and real-world projects, I have worked extensively with **React, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, and MongoDB**, delivering features end-to-end—from building responsive user interfaces and integrating REST APIs to designing back-end services, implementing authentication, and optimizing database performance.

One of my most significant accomplishments is developing **Samarthya AI**, an enterprise-grade HR SaaS platform. In this project, I developed **160+ production-grade REST APIs**, built **role-based dashboards** capable of handling **10,000+ employee records**, implemented **secure authentication and Role-Based Access Control (RBAC)**, and reduced manual HR effort by **80%** through workflow automation.

During my internships at **Timechain Labs, AstraTech AI, and Cerebry**, I contributed to production systems by building reusable component architectures, translating Figma designs into responsive interfaces, optimizing frontend performance, improving API workflows, and collaborating closely with cross-functional teams to deliver reliable software.

Beyond technical expertise, I bring **ownership, problem-solving ability, clean coding practices, continuous learning, and a product-first mindset**. I enjoy solving complex engineering challenges and building software that creates measurable business value while maintaining high standards of quality and scalability.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my experience, technical expertise, and engineering mindset can contribute to your team. I look forward to the possibility of contributing to your organization's success.

Sincerely,

Rohit Raj
